Application/Control Number: 10/037,966

Art Unit: 2874

A copy of the response to the previous Office action (paper number 6, mailed July 9, 2003) has been received. The response was originally submitted on October 1, 2003, and was delivered to the USPTO by the United States Postal Service at 9:39 AM on October 2, 2003. It is thus clear that there was a timely response to the previous Office action, and the recently mailed holding of Abandonment (paper number 0204, mailed February 5, 2004) was erroneous. No Abandonment of this application ever occurred. The holding of Abandonment is therefore withdrawn, and the following actions are now taken.

Claims 4 and 20 are objected to because of the following minor deficiencies. In claim 4, line 2, "form" should be "from"; and in claim 20, line 23, "for" should be inserted after "adapted".

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR § 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR § 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR § 3.73(b).

Claims 1-4, 23-27, and 47-59 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 83-112 of copending U.S. Patent Application Serial No. 10/187,030. Although the conflicting claims are not identical, they are not patentably distinct from each other

Application/Control Number: 10/037,966

Art Unit: 2874

because all of the elements of the device set forth in the above-identified claims can be found in various combinations of claims 83-112 of copending U.S. Patent Application Serial No. 10/187,030. For example, claims 83, 112, and 91 of copending U.S. Patent Application Serial No. 10/187,030, taken together, represent the same invention as claim 1 of the present application. Slight differences, such as the last two lines of claim 23 of the present application, would be obvious to a person of ordinary skill in the art, since it would have been routine to position a multi-layer waveguide structure on a substrate, and since the various materials claimed are all well known and commonly used in the semiconductor arts. This is a provisional rejection because the claims have not, in fact, been patented.

Claims 12-22 are allowed. The transverse resonantly coupled optical devices of these claims are not disclosed or reasonably suggested by the prior art of record, particularly U.S. Patent 6,445,724 to Abeles (previously relied on).

Applicant's arguments filed on October 1, 2003, have been considered but are moot in view of the new grounds of rejection. The Examiner does, however, agree with applicant's characterization of the Abeles reference as set forth in the REMARKS of the 10/01/03 communication, and agrees that Abeles neither discloses nor suggests the invention as claimed herein. The previously applied rejections based upon Abeles are, therefore, withdrawn.

Any inquiry concerning the merits of this communication should be directed to Examiner John D. Lee at telephone number (571) 272-2351. The Examiner's normal work schedule is Tuesday through Friday, 6:30 AM to 5:00 PM. Any inquiry of a general or clerical nature (i.e. a request for a missing form or paper, etc.) should be

Application/Control Number: 10/037,966

Art Unit: 2874

directed to the Technology Center 2800 receptionist at telephone number (571) 272-1562, to the technical support staff supervisor (Team **8**) at telephone number (571) 272-1564, or to the Technology Center 2800 Customer Service Office at telephone number (571) 272-1626.
